***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 7-12, 14-17, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawasaki et al.(U.S.Pat.5,781,010) in view of NessAiver(U.S.Pat.5,329,925).

Kawasaki discloses a method and apparatus for MR imaging without a flashing phenomenon of an object having periodical motion that shows all the features of the claimed invention save physiological data on an MR image. NessAiver discloses a reduced scan time cardiac gated magnetic resonance CINE and flow imaging that shows an image correlation of both physiological data an MR data. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to do to create a quantized motion image.

***Allowable Subject Matter***

Claims 6, 13, 18 and 20 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
